

Remarks

On page 9 of the Notice of Allowability, in the statement of the Examiner's Reasons for Allowance, the examiner states, "While Moreau ... discloses a method for effectively aminating a pneumococcus type 5 capsular polysaccharide in under 4 hours, which is expected to produce a composition free of impurities and substantially similar to that produced by the "first method" recited on p. 4 lines 19-25 of the specification...." The applicants note that this appears to be the same assertion made during prosecution, and the applicants maintain their traversal of this position for the reasons of record.

If it is believed that a teleconference will advance prosecution, the examiner is encouraged to contact the undersigned as indicated below.

Date: September 1, 2010

Respectfully submitted,
/Michael S. Greenfield/
